

Developing a School Reading Professional Development Plan

Interactive Leadership Team Workshop

60 Minutes

Outcome: A targeted, evidence-informed professional development plan that builds staff capability in reading instruction and supports improved student outcomes.

Analyse the Audit Findings

Review your Reading PD Audit results as a leadership team. Identify strengths, areas for development, and gaps. Prioritise 2-3 key improvement areas.

Strengths	Areas for Development	Priority Areas (2-3)
What is working well in reading instruction and PD across the school?	Where are the gaps in staff knowledge, confidence, or practice?	Which 2-3 areas will have the greatest impact on student outcomes?

Determine Professional Learning Priorities

Define what staff need to know, understand, and implement. Align priorities with school improvement goals, system priorities, and evidence-based reading practices.

Priority Area & What Staff Need to Know

For each priority area, what do staff need to know, understand, and be able to implement?

Alignment to Goals & Evidence Base

How does each priority align with school improvement goals, system priorities, and evidence-based reading practices?

Identify Professional Development Opportunities

Research and select professional learning that directly addresses identified needs. Consider workshops, online courses, coaching, professional reading, lesson observations, collaborative planning, and PLCs.

PD Options & Approaches	Selection Criteria	Practical Considerations
List potential PD activities for each priority area (workshops, coaching, PLCs, observations, etc.)	How will you ensure PD is evidence-informed, practical, and relevant to staff contexts?	What resources, time, and support are needed? Who will facilitate or coordinate?

Develop the Professional Development Plan

Outline each priority area, associated PD activity, intended outcomes, timeline, responsible personnel, and resources. Include opportunities for staff to apply learning and receive feedback.

Priority Area	PD Activity	Intended Outcomes	Timeline	Who	Resources
Priority 1					
Priority 2					
Priority 3					

Monitor Impact and Adjust

Establish measures of success. Review progress regularly and refine the plan to ensure ongoing improvement.

Measures of Success

What evidence will show impact? Consider:

- Changes in teacher practice
- Student achievement data
- Staff confidence surveys
- Classroom observation notes

Review & Refine

How and when will you review progress?

- Review schedule (e.g. termly)
- Who is responsible for monitoring?
- How will adjustments be communicated?
- What triggers a plan revision?
